

1. Technology Skills

Improving the technology skills we have to improve our current skill level, we have to set clear goal, practice regularly, stay updated and build strong portfolio. Using this techniques we can improve our technology skill.

2. Certification or Courses

I recently completed my graphics Design course from tops technology, now I'm working on my portfolio.

2. Approach learning & development

Approaching learning and development in graphic design is a dynamic process that involves a blend of structured learning, hands-on practice, and ongoing exploration like: Understand the Fundamentals, Explore Design Software, Practice Regularly, Study Design Theory, Build a Portfolio, Stay Updated.
